

THE TECH

VOL. XXXI. NO. 63

BOSTON, MASS., SATURDAY, DECEMBER 9, 1911

PRICE TWO CENTS

VARSITY BASKETBALL SCHEDULE ANNOUNCED.

Capt. Schar Picks Six Men For Team Out of Big Squad—Three Old Men.

Manager Freedman, of the Varsity basketball team, has announced the probable schedule of the team which consists of eleven collegiate games and two trips to New York State. Captain Schar has picked a provisional team which is as follows: Forwards, C. J. McCarthy and R. S. Schar; guards, A. J. Freedman and C. N. Hudson; center, F. L. Mowry, and utility, H. E. Morse.

The schedule is as follows:

December 22—Springfield Training School at Springfield.

December 23—C. C. N. Y. at New York.

January 6—New Hampshire State at Durham.

January 25—St. Lawrence University at Canton, N. Y.

January 26—Rensselaer Polytech at Troy.

January 27—Union College at Schenectady.

February 3—Rhode Island State at Kingston, R. I.

February 10—Dartmouth at Hanover.

February 14—Brown at Tech Gym.

February 17—Wesleyan at Middleton.

February 28—Brown at Providence

SWIMMING MEET TODAY.

Second Eliminations to Decide Entries for Brookline Meet.

Swimmers will report this afternoon at 3 P. M., in the Cabot Tank, for the second elimination trials. See either the Captain or Manager as soon as you reach the Tank, and be on time. Take Columbus avenue car to Ruggles street.

Many new men and much improvement is the result of the work of the past week, and as some of the newer candidates have shown speed, the trials should be much closer than those of last week.

PUBLIC SPEAKING.

The exercise in Public Speaking will be held, as usual, in 23 Walker, at 9 A. M., on Monday. Five-minute talks will be given by Messrs. Blackwood, Bruner, Caldwell, Clark, Moore and Swatzburg. Mr. Frederick P. Fish of the Corporation has promised to be present, and is expected to tell the class something of the conditions under which an ability to speak in public is useful to a professional man.

Mr. Fish has, as everybody knows, had an unusually wide experience in public life. As presiding officer on various boards and commissions, and as director and president of large banking and industrial companies, he has had every opportunity to know the value of good speaking ability.

Visitors are always welcome to the exercise.

The 304th anniversary of the birth of John Harvard was celebrated on Monday, November 27th, by a short address in Appleton Chapel, Cambridge.

EXCELLENT CONCERT GIVEN LAST NIGHT

Program Given by Orchestra Enjoyed by Nearly a Hundred Men.

Did you miss one of the best Union Nights ever last night by not going to the Pop Concert? The Entertainment Committee arranged an evening that couldn't be improved. The members of the Orchestra deserve much credit for the way in which they handled the most difficult of selections, two of which would have done credit to Boston's best.

The first piece was "Dear Old M. I. T.," during which the fellows all stood and sang, winding up with a "long cheer."

Following this came the rendition of one of the standard operas.

Again, after a short interval, of cards and eats, a catchy piece of dance music was given in such a way that after many rounds of applause it had to be repeated.

Other numbers on the program were: Faust, The Chocolate Soldier, The Cardinal and the Gray, Take Me Back to Tech and the Stein Song.

Refreshments of ice cream and cake and ginger ale were served during the evening, and there was a lot of snappy cheering which made the evening much brighter.

PORTFOLIO NOMINATIONS

Senior Portfolio nominations close today at 6 o'clock. As the communication in yesterday's issue stated none had been handed in up to Thursday night, however, three or four have been left at the Cage since then, and President Kebbon is hoping for several more before nominations close.

The Senior Book is less important as a publication in general than in its value to members of the class. For this reason nominations should be as general as possible, as Kebbon has pointed out.

MACLAURIN RECEIVED.

This evening President Maclaurin and his wife will be received by Mr. and Mrs. J. M. Longyear at their Brookline residence. Invitations have been sent to the Faculty and Corporation requesting them to attend and bring their wives.

COURSE CONFERENCES.

All first-year men will be expected to attend conferences with the heads of departments next week, in regard to the choosing of their Courses. The hours and places of holding these conferences will be announced in Monday's TECH. This is a most important matter, and every man is expected to attend all the conferences in which he is interested as he will be expected to present his choice of course to the Faculty within a few weeks. Watch Monday's TECH for announcement of the hours and places of holding the meetings.

Professor Houghton of Amherst will conduct a party of Amherst students through Europe next summer, offering at a moderate cost the opportunity of seeing the best things across the water under competent guidance.

REQUIREMENTS FOR VARSITY INSIGNIA

Advisory Council Gives Cross-Country Men Better Chance—Marceau Gets "T."

The requirements for the Varsity T for Cross-Country were slightly lowered by the Advisory Council at the last meeting of that body. Up to this time it has been necessary for a man to get tenth place or better in the I. C. A. A. A. race, and the Council have decided to award the insignia to a man who makes twelfth or better in the future. The old rule giving a man who takes first or second place in a recognized dual meet was not changed.

The Council awards a T to "Gene" Marceau, 1912, who was the first Tech man to finish in the Tech-Harvard race last fall.

CIVIL SOCIETY TRIP.

Latest Dope on the Sunday Morning Special Train.

(Special Wire to THE TECH.)

At eleven-thirty last night the final arrangements for the trip to Natick on Sunday were completed and the plans were proven O. K. Tomorrow morning, long before sunrise, a big bunch of Tech men will gather at Trinity Place to take a special car which will be hooked to a work train leaving sharp at 5.30.

This train will not wait a minute for anyone, so that it is up to all those who wish to go to Lake Crossing to see the big bridge put into service to get up and be on time. This will be one of the best examples of railroad engineering problems that can be seen around Boston, and those who don't take advantage of it will miss a great object lesson for the simple privilege of a few hours' sleep.

"DIRTY MILK."

Yesterday afternoon the second of the series of lectures by Milton J. Rosenau, on "Dirty Milk," was given in Huntington Hall. The audience was small but the speaker impressed upon the minds of those who did attend the value of using strictly pure milk and keeping it in sanitary surroundings.

SPECIAL PRACTICE.

There will be a special practice of the Hockey Team at the Arena tonight from 5.15 P. M. The team will have the full use of the ice and every man must report in suit promptly at the specified hour. Manager Ranney wishes to especially emphasize the work tonight and to request every man on the squad to show up without fail.

FRESHIES' BASKETBALL.

Basketball practice for the Freshmen will be held in the Gym this afternoon at 12 o'clock. The floor has been secured regularly on Saturdays from 12 to 2, so there need be no more confusion about who has the right to the floor. Manager Scully would like to have every man cut on time so that the work may be finished early, and those fellows who live out of town can get home.

ORIGINAL IDEAS IN BERLAGE LECTURE

Points Out Relations Between Architecture and Science—Small Audience.

It was unfortunate that so few people could have heard the excellent and exceedingly interesting talk given by Mr. H. P. Berlage, the European architect from Amsterdam, Holland, last evening, in Huntington Hall, on the "Foundation and Development of Architecture," for it proved to be one of the most instructive and truly advantageous discourses that have ever been given at the Institute.

In making this American trip Mr. Berlage is endeavoring to set forth truer architectural principles and instill into the minds of the general public a knowledge of what the best really is from his own point of view as a modern architect. He is eminently well fitted to do this, for he is one of the most prominent members of the profession in Europe, and his lecture was obviously that of a thinker of individuality and courage in carrying out what he considered to be the best for the greatest progression.

He at first spoke of the difference of opinion of artists and architects concerning the beautiful and what goes to make up the most harmonious beauty, and then stated that to him there was but one ultimate point of view which could exist,—of considering all art from purely a natural standpoint,—as having all its basic forms in nature and hence in the sciences. He pointed out the relation between many of the geometrical figures and plant life and showed how several of the greatest developments in architecture have been along these lines, citing as an example the Gothic structures in their earliest forms.

(Continued to Page 3, Col. 2.)

PROFESSOR ABSENT.

Professor Robert H. Richards of the Mining Engineering Department is absent from his classes, owing to the fact that he has been called to Michigan on business. Professor Richards is stopping at Hancock, the place where he conducted his investigations in copper refining this past summer.

CALENDAR.

Saturday, December 9th.
12.00—1915 Basketball—Gym.
3.00—Swimming Tryouts—Cabot Tank.

5.15—Special Hockey Practice—Arena.
6.00—Senior Portfolio Nominations Due—Union

8.00—Lowell Institute—Huntington Hall—Dr. Johannsen.

Sunday, December 10th.
5.30 A. M.—Trip to Natick—C. E. Society—Trinity Place.

Monday, December 11th.
Junior Prom Nominations Close.
4.15—Glee Club Rehearsal—Union.
9.00—Open Exercises—Public Speaking.

7.40—Mandolin and Banjo Clubs—Dudley Street, East Loop.

Tuesday, December 12th.
4.10—C. E. Meeting—Prof. McKibbin—6 Lowell.

WINTER CONCERT, SEAT SALE, UNION 1 p. m.

THE TECH

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

IN CHARGE OF MONDAY ISSUE.

EDITOR—Oettinger, M. A., 1914.
Associates—Belcher, Don., 1915; Mann, E. W., 1914.

Last night, in the Union, the Entertainment Committee showed that they were right on the job by giving the undergraduates a chance to hear the Technology Orchestra at the Pop Concert. The Orchestra gave a splendid account of itself, and the evening was a grand success for those who went, but where were all of the other five hundred or more Tech men who did no studying last night?

It is positive that they were not at the Pops; neither did they attend the fine lecture given in Huntington Hall on the "Foundation and Development of Architecture," by Mr. H. P. Berlage. Is there not some way in which the undergraduates can be made to realize the importance of supporting Institute activities before they give their backing to things outside? When we have nothing in the Union on Friday night we have a loud cry raised for a Union Night—when we have a Union Night everybody is busy—what is the matter? The concert was an unqualified success, but the crowd could not be called that.

It seems that the Advisory Council have made a very wise move in changing the requirements for a T in Cross-Country. This is a sport that we can not be too proud of, and one that we can not do too much to help along.

INFORMAL TALK.

M. E. Society to Discuss High Speed Gasoline Engines.

Next Tuesday evening, December 12th, the Mechanical Engineering Society will meet in the Union at 7.45. Two Seniors, Messrs. A. R. Davis and D. Dasso, will talk on "High Speed Gasoline Engines," a subject of interest and importance.

Mr. Dasso, due to a knowledge gained abroad during the last year, is well suited to discuss modern European designs. He invariably defends the foreign makes when an argument is started in the class room, and any man who has any interest in the subject should attend the meeting and hear what the speakers have to say. It is to be a very informal gathering, and all are cordially invited to be present, whether they are members of the Mechanical Engineering Society or not.

Basketball has been abolished by the Athletic Council of Trinity. The student body is objecting and an effort will be made to replace it as one of the college sports.

COMSTOCK DEVISES LIGHTHOUSE SIGNAL

Invention of Institute Professor Now in Use to Warn Keepers of Broken Mantles.

One of the professors of the Physics Department, D. F. Comstock, has perfected a little device which will prove of almost inestimable value to the life saving department. It is a signal which will call the attention of the lighthouse keeper to the lantern if the light should go out when he is in such a position that he couldn't see it.

On the Great Lakes there are a great many beacons which burn gas in a Welsbach mantle of a very fragile nature. On Lake Superior alone there are more than three hundred of this type. In case the mantle breaks in this style of lamp the light is gone, and unless the keeper is right on the job he might not notice that the lantern was not burning.

Professor Comstock's invention is devised to give a signal by means of the difference in conductivity of a compound which is a secret part of his invention, due to the difference in the heat distribution between the mantle when it is whole and when it is broken. It is evident, of course, that there will be a difference, for in the first case the mantle is giving off a white light, and in the other case it is merely a blue flame. In collaboration with Professor Kalmus, formerly of the Institute, this little instrument which keeps guard over the guardians of the seas has been put into commercial shape through the action of this principle.

As the patent has not yet been granted the details cannot be made public at this time, but it is in such form that it has been accepted by the Canadian government for use on its Lake lighthouses.

INTERCOLONIALS

Meet the Fast Boston Team at Arena in Hard Battle Tonight

Hockey enthusiasts will have a chance to see some fast hockey at the Arena tonight, when the B. A. A. and the Intercolonials cross sticks for the first time. The men on the lineup of these two teams comprise the best hockey players in the city, and since both teams are out for the championship they will take no chances of losing this, the first game. The Boston team is composed of the men who held the title last year, and have a slight call for that reason, although the Intercolonials have made the best score against the Institute team.

NOTED TURK AT TECH.

The Turkish government has recognized the 'Stute as the foremost engineering school of the country, and perhaps of the world, by sending Shahin A. Ajemian here for his education in civil engineering. Mr. Ajemian arrived in Boston yesterday and will enter on his work immediately. After the completion of his four year's course he will return to Turkey and become head of the government's department of civil engineering.

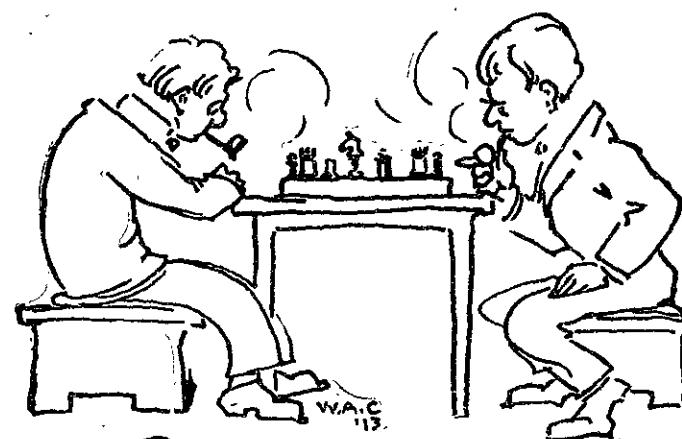

SOPHS' FIRST GAME.

The Sophomore basketball team will play their first game today at Bridgewater Normal. The Bridgewater team is a very fast one, and the "Sophs" will have to hustle to beat them. Last year the Normal School beat the Varsity second team, and have always shown considerable strength in this sport.

The team that will accompany Captain Comber is as follows: Tyrell, Ruoff, Williams, Henderson, Claverly, Price and Gallen.

Velvet

THE
SMOOTHEST
TOBACCO

A CHECKMATE to your smoke that bites and burns! Velvet—the selected tender middle leaf—aged in the leaf over two years—producing a mellowness that only the measured pace of time can encompass. A flavor and smoothness tremendously good!

Pipe smoking with Velvet is a revelation—proving that time only can make tobacco what we would all have it—smooth.

WINTER CONCERT AND
DANCE LOOK PROMISING

Tickets Should Be Exchanged
For Seat Checks at
Cage.

From today at noon until noon on Thursday, December 14th, tickets for the Winter Concert of the Technology Musical Clubs may be exchanged at the Cage for reserved seat checks. The sale of tickets for this year's concert has far surpassed that of any other year, and it is therefore very important that men who wish to get good seats turn in their tickets at the Cage immediately.

The Winter Concert, which will be held in Copley Hall on the evening of December 15th, promises to be the best in years. The clubs have given several performances in preparation for the concert, and the men have showed up well in every instance. The Orchestra will also have a good tryout in the "Pop Concert" tonight, and it is expected to come up to the mark.

It is expected that the musical program will be completed by 9:30 o'clock, and from that time until 1 there will be dancing. Preliminary dance orders will be given out with the reserved seat checks and final orders will be distributed on the evening of the party.

The manager of the Musical Clubs has arranged with Poole's Orchestra to play the dance music and as things look now the evening will be a great success.

The following ladies have kindly consented to act as patronesses:

Mrs. Richard C. MacLaurin.
Mrs. Alfred E. Burton.
Mrs. Walter Humphreys.
Mrs. Alyne L. Merrill.
Mrs. Henry P. Talbot.

CIVIL SOCIETY.

The Austin Dam Failure to Be
Discussed Next Tuesday.

The Civil Engineering Society will hold an open meeting in 6 Lowell next Tuesday afternoon. Professor Spofford has been able to get Professor F. P. McKibben, M. I. T., '94, to talk on "The Austin Dam Failure."

Professor McKibben has come from Lehigh University to give the same lecture to the American Society of Civil Engineers, and the men of Tech will have an excellent opportunity to acquaint themselves with the opinions of a recognized authority. The failure of the Austin Dam is of interest to engineers, for many questions as to the proper form for foundations are now reopened.

BERLAGE LECTURES.

(Continued from Page 1.) This led to the conclusion that art finds its highest consideration in the sciences, and that a general principle may be given that to obtain the greatest unity we must follow nature.

He then considered the development of architecture through the ages and made it evident that the strictest mathematical rules have been applied to determine proportions. As a means of clarifying this point many buildings were thrown upon the screen with various geometrical figures traced upon them. Mr. Berlage then said that the lack of architecture in Japan is due to the very fact that its art is purely free and considers no scientific principles.

In conclusion he stated that it is impossible to follow the principles of geometry and mathematics for any true progress in architecture, but only as a method to gain an end.

For the convenience of men who live great distances from Cambridge, the Harvard Faculty will grant petitions for extension of time on the Christmas vacation.

ONE PIECE HAMMER
IN THE NEW MODEL

Ithaca

IF you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached.

WE have cut out all cocking levers, bars, push rods and hammer-stirrups and cock the gun direct from the head.

OUR hammer travels less than half an inch, taking only 1/32 of a second to operate.

STOCKS are not cut away for hammers or lock plates and are dovetailed into frame to prevent splitting and spreading.

THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically tool-proof, and will last you a lifetime if you take care of it and a good many years if you don't.

CATALOG Free; 18 grades, \$17.75 net to \$400 list. OUT 51-1 lb. 20 bore is a hammer—be down-to-date and shoot one.
